DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 10-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,620,015. The claims of the instant application recite most of the elements of the patented claims except for a second opening and a plurality of legs. However, it would have been obvious to delete these features from the bubble producing device in the patent for the purpose of making the device to more economical to produce.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/655,830

Art Unit: 3712

Claims 10-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hackell.

Regarding claims 10, 13,, Hackell teaches in the figures a plurality of loops (fig. 1), a cylindrical wall (fig.1), a flared edge extending at an angle (fig.1) and a connector (fi.g).

Regarding claims 11 and 14, Hackell teaches the cylindrical wall has an inner and outer surface and plurality of ridges (fig.1).

Regarding claims 12 and 15, Hackell further teaches the bottom edge of the cylindrical walls is angled (fig.1).

Regarding claim 13, Hackell further teaches a second opening and means positioned adjacent the second edge (fig.1).

Regarding claims 17-22, Goya et al teaches a plurality of loops (fig.1), a connector (40), flared edges (fig.1), a plurality of legs (20), inner and outer surface (fig. 1) and angled cylindrical walls (fig. 1).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harwood, Waterman et al and Campbell.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 703.305.0643. The examiner can normally be reached on Monday-Friday.
